

APPROVED

At the REGULAR MEETING of the Town Board, Town of Clay, Onondaga County, held at the Town Hall, Clay, New York on the April 1, 2024 at 7:30 P.M., there were:

PRESENT:

Damian Ulatowski	Supervisor
Joseph A. Bick	Deputy Supervisor/Councilor
David Hess	Councilor
Eugene Young	Councilor
Ryan Pleskach	Councilor
Deborah Magaro-Dolan	Councilor
Jill Hageman-Clark	Town Clerk
Mark V. Territo	Commissioner of Planning and Development
Robert Germain	Town Attorney
Ron DeTota	Town Engineer

ABSENT:

Luella Miller	Councilor
---------------	-----------

OTHERS PRESENT:

Russ Mitchell, Planning Board Chairman; Hal Henty, Planning Board Member.

The meeting was called to order by Supervisor Ulatowski at 7:30 P.M. All present joined in the Pledge of Allegiance.

**Approval of Minutes:**

Councilor Bick made a motion to approve the minutes of the Regular Town Board meeting. Motion was seconded by Councilor Magaro-Dolan.

Ayes – 5 and Noes – 0. *Motion carried. Councilor Pleskach abstaining due to absence.*

**Cancellation and/or requested adjournments.**

Supervisor Ulatowski said that items 9, 10 and 12 will not be heard. The application for Tully's Tenders will be adjourned because the Planning Board has adjourned it and not given a recommendation.

**Correspondence:**

There was no correspondence.

**REGULAR MEETING:**

**ZONE CHANGE (PH) Town Board Case #1197 - NELSON ASSOCIATES ZONE CHANGE/SHARON CHEVROLET:**

A public hearing to consider the application of **NELSON ASSOCIATES ZONE CHANGE/SHARON CHEVROLET** for a Zone Change from RA-100 Residential Agricultural District to HC-1 Highway Commercial District to allow for an expansion of existing auto dealership on land located at **3687 State Route 31, part of Tax Map No. 020.-01-14.4**, consisting of +/- 1.87 acres of land. (ADJOURNED FROM THE 3/4/24 MEETING) was opened by the Supervisor.

Tim Coyer of Ianuzi and Romans was present on behalf of the applicant and began by explaining that there are no changes to the plan and the Planning Board gave a favorable recommendation.

Supervisor Ulatowski asked how many new parking spots would be provided. There will be 120 new spots to park vehicles on site.

Councilor Bick asked where the water will drain. Mr. Coyer said that it will drain to the north, not across Route 31.

Councilor Hess asked if the access easement will be extended; Mr. Coyer said that they will do that.

There being no more questions or comments, the Supervisor **closed** the public hearing.

*Supervisor Ulatowski said that he would open both public hearings together.*

**SPECIAL PERMIT (PH) Town Board Case # 1198 - QP2 PROPERTIES, LLC (bank):**

A public hearing to consider the application **QP2 PROPERTIES, LLC** for a Special Permit to allow for a drive-in bank service pursuant to Section 230-18 G.(1)(b) – Site Plan Special Permit, on land located at **4591 NYS Route 31, Tax Map No. 045.-01-02.1**. (ADJOURNED FROM THE 3/4/24 MEETING)

**SPECIAL PERMIT (PH) Town Board Case # 1198 - QP2 PROPERTIES, LLC (coffee shop/café):**

A public hearing to consider the application of **QP2 PROPERTIES, LLC** for a Special Permit to allow for a drive-in coffee shop/cafe pursuant to Section 230-18 G.(1)(b) – Site Plan Special Permit, on land located at **4595 NYS Route 31, Tax Map No. 045.-01-02.1.** (ADJOURNED FROM THE 3/4/24 MEETING)

Alex Wisnewski explained that they are proposing a drive thru service window on both the proposed bank, and the Café Kubal. He continued that they received a positive recommendation from the Planning Board. He explained that there are no changes from the previous hearing. Mr. Wisnewski stated that he sat at the existing Café Kubal on March 8<sup>th</sup> from 7:10 AM to 8:30 AM (peak hours) and counted 27 cars; 14 of the 27 using the drive-thru. He concluded that the traffic study suggested 50-53 peak for the new location making this a fair and accurate estimation. Mr. Wisnewski added that the Dunkin Donuts had a larger line.

All questions and comments heard; the Supervisor **closed** the public hearing.

**Franchise Renewal – (A/D) SPECTRUM NORTHEAST, LLC:**

No Action.

**Special Permit (PH) Town Board Case #1201 – TULLY'S GOOD TIMES:**

**\*Planning Board adjourned to 4/24;** Councilor Young made a motion to adjourn the public hearing to **May 6, 2024 at 7:35 P.M.** Motion was seconded by Councilor Magaro-Dolan.

Ayes – 6 and Noes – 0. *Motion carried.*

**SPECIAL PERMIT (PH/Adj.) Town Board Case #1196 – GOGUEN DRIVE REALTY, LLC:**

A public hearing to consider the application of **GOGUEN DRIVE REALTY, LLC.**, for a Special Permit pursuant to Section 230-17 E.(2)(a)[4] - Bulk Processing Facility, to allow for a Concrete Batch Plant on land located at **7835**

**Goguen Drive, Tax Map No. 087.-01-08.1** consisting of +/- 6.24 acres of land.  
(ADJOURNED FROM THE 2/5/24 & 3/4/24 TB MEETING)

Supervisor Ulatowski opened the public hearing explaining to the vast and vocal crowd that the applicant would give a brief overview. The Town Board and the public will then have the opportunity to ask questions. He asked that people try not to be redundant.

James Trasher of CHA began by explaining that he was newly involved with this application and that the purpose tonight was for him to collect questions to be researched and answered at a later hearing. He continued that he does not have an abundance of technical comments or answers and plans to research the application to give well studied answers. The residents were unreceptive to this answer.

Supervisor Ulatowski asked for clarification as to the difference between a batch plant, concrete and cement. Geoff Hillenbrand of Plumley Engineering explained that no heat is used in a batch plant; cement is made by heating limestone and concrete, which emits greenhouse gases. No fossil fuels are released in a batch plant and only minimal dust. Many residents balked at this statement. The Supervisor asked about the height of the proposed structure. Mr. Trasher said 50' or less; he is working with the manufacturer. There was a discussion as to whether the structure is enclosed either fully or partially.

Councilor Hess thanked the residents for coming; both those in favor and those opposed to the application. He asked the applicant if they will seek a height variance if the structure does not meet the code. He added that he would like to see the DEC Permit.

Councilor Young asked to be walked through the process. Mr. Hillenbrand explained that the (dry) sand and limestone is placed in the hopper, then to a conveyor belt, water and cement are then added. Councilor Young asked if the conveyor is fully enclosed. Mr. Hillenbrand said only over the top and it then travels to a second conveyor to a hopper where it is mixed (that is fully enclosed), then dumped into a chute (enclosed) into trucks. Many residents began loudly protesting. One resident asked if they had permission to begin making concrete before the permit was granted. Another resident asked if they had applied to construct this business anywhere else and been denied.

Many residents spoke out primarily in opposition to the application, stating concerns with infrastructure, increased traffic, decrease in property values, noise and air quality. One resident asked who will monitor the air quality; the DEC is responsible for that. Another resident asked if the Special Permit could be revoked if the applicant does not adhere to guidelines. It can after a violation has been issued and the violation has not been corrected. It will go through the legal process ending with revocation of the Special Permit.

Councilor Hess made a motion to adjourn the public hearing to **May 6, 2024 at 7:38 PM**. Motion was seconded by Councilor Bick.

Ayes – 6 and Noes – 0. *Motion carried.*

**Franchise Renewal – (A/D) SPECTRUM NORTHEAST, LLC:**

No Action.

**ONONDAGA COUNTY COMMUNITY DEVELOPMENT for the year 2024 (CPH):**

Councilor Magaro-Dolan moved the adoption of a resolution **approving** the use of funds by the Town of Clay with respect to the applications for funding filed with **ONONDAGA COUNTY COMMUNITY DEVELOPMENT** for the year 2024. Motion was seconded by Councilor Young.

Ayes – 6 and Noes – 0. *Motion carried.*

**Special Permit (PH) Town Board Case # 1202 - JUSTIN'S CANINE CAMPUS:**

Councilor Magaro-Dolan moved the adoption of a resolution **approving** the application of **JUSTIN'S CANINE CAMPUS** for a Special Permit pursuant to Section 230-16C.(2)(e)[14] – Animal Care/Training Facility, on land located at **Clay Common's, Oswego Road, Tax Map No. 066.-01-48.4** to allow for a dog daycare. Motion was seconded by Councilor Bick.

Ayes – 6 and Noes – 0. *Motion carried.*

**Contract - TOWN OF CLAY LANDFILL POST CLOSURE  
ENVIRONMENTAL MONITORING PROGRAM:**

Councilor Pleskach moved the adoption of a resolution authorizing the Supervisor to execute a contract with **C&S ENGINEERS, INC.**, for professional services to be rendered for the year 2024 in compliance with the DEC Regulations for the **TOWN OF CLAY LANDFILL POST CLOSURE ENVIRONMENTAL MONITORING PROGRAM**. Said services not to exceed the sum of \$9,200.00. Motion was seconded by Councilor Magaro-Dolan.

Ayes – 6 and Noes – 0. *Motion carried.*

**Zone Change (PH) Town Board Case #1200 - S&G ACQUISITIONS:**

Councilor Hess moved the adoption of a resolution calling a public hearing on April 15, 2024, commencing at 7:35 P.M., local time, to consider the application of **S&G ACQUISITIONS** for a Zone Change from O-1 Neighborhood Office District to LuC-2 Limited Use District for Restaurants, to allow for an event space and commissary kitchen on land located at **5570 Caughdenoy Road, Tax Map No. 079.-05-73.1 f/k/a 079.-05-73.0**, consisting of +/- 6.5 acres of land. Motion was seconded by Councilor Magaro-Dolan.

Ayes – 6 and Noes – 0. *Motion carried.*

**Bid Award - Town of Clay New Town Hall Roof:**

Councilor Hess moved the adoption of a resolution awarding the bid for the **Town of Clay New Town Hall Roof**, and authorizing the Supervisor to execute a contract with **Pulver Roofing**, the lowest responsible bidder in the amount of **\$494,000.00**. The Agreement shall be approved as to form and content by the Town Attorney. Motion was seconded by Councilor Magaro-Dolan.

Ayes – 6 and Noes – 0. *Motion carried.*

**Agreement - ALL CITY MANAGEMENT SERVICES:**

Councilor Young moved the adoption of a resolution authorizing the Supervisor to execute an Agreement with **ALL CITY MANAGEMENT SERVICES** for providing School Crossing Guard Services for a one (1) year period; to commence on or around July 1, 2024, to June 30, 2025 (2024/2025 school year). This agreement may be renewed under the same terms for two (2) additional school years (2025-2026 and 2026-2027) upon written consent by both parties. The Town agrees to pay for the services rendered pursuant to the Agreement, the sum of Thirty-Two Dollars and Three Cents (\$32.03) per hour of guard service to be provided. The cost of providing One Thousand, Nine Hundred Eighty (1,980) hours of service shall not exceed Sixty-Three Thousand Four Hundred Twenty 00/100 Dollars (\$63,420.00), and further authorizing the Supervisor to execute the necessary documents therefore. The Agreement shall be approved as to form and content by the Town Attorney. Motion was seconded by Councilor Magaro-Dolan.

Ayes – 6 and Noes – 0. *Motion carried.*

**Adjournment:**

The meeting was adjourned at 9:31 P.M. upon motion by Councilor Young and seconded by Councilor Magaro-Dolan.

Ayes – 6 and Noes – 0. *Motion carried.*

  
Jill Hageman-Clark RMC / Town Clerk

# PETITION IN OPPOSITION TO SPECIAL PERMIT

278

WE, as citizens and real property owners within the zone of impact of a proposed Concrete Batch Plant and Facilities project located at 7835 Goguen Drive Tax Map No. 087.-01-08.1 located in the I-1 Industrial District on +/- 6.24 acres of land in the Town of Clay do hereby **OPPOSE** an application for a Special Permit pursuant to Section 230-17 E.(2)(a)[4] - Bulk Processing Facility, to allow for a Concrete Batch Plant filed by GOGUEN DRIVE REALTY, LLC and currently pending before the Clay Town Board.

We submit this Petition to the Clay Town Board and declare citizen opposition to the project based upon the fact the current proposal is incompatible with the surrounding neighborhoods, may be harmful to the environment, and may represent a health threat for some of our citizens.

# PETITION IN OPPOSITION TO SPECIAL PERMIT

WE, as citizens and real property owners within the zone of impact of a proposed Concrete Batch Plant and Facilities project located at 7835 Goguen Drive Tax Map No. 087.-01-08.1 located in the I-1 Industrial District on +/- 6.24 acres of land in the Town of Clay do hereby **OPPOSE** an application for a Special Permit pursuant to Section 230-17 E.(2)(a)[4] - Bulk Processing Facility, to allow for a Concrete Batch Plant filed by GOGUEN DRIVE REALTY, LLC and currently pending before the Clay Town Board.

We submit this Petition to the Clay Town Board and declare citizen opposition to the project based upon the fact the current proposal is incompatible with the surrounding neighborhoods, may be harmful to the environment, and may represent a health threat for some of our citizens.

To the Town of clay residents, below is the new environmental and public health statements about Ready mix concrete facilities

"A ready-mix concrete plant creates sources of public health and local environmental risks due to noise pollution, irritant dust, air emissions and the potential for contaminated water discharge. These locations contain industrial operations that mix cement, aggregates, and water to create concrete mixtures, which are then transported to construction sites for use. The facility consists of batching plants, mixing equipment, storage silos, and loading areas.

Local air quality can be impacted from operational generated emissions and for the transport of material. Operational impacts are due to emissions generated during the mixing process including particulate matter, nitrogen oxides, carbon monoxide, volatile organic compounds, and sulfur dioxide are among the pollutants that may be released from the facility. Other sources of air pollution can occur from the disturbance of nuisance dust from trucks and other traffic added to the area like particulate matter, irritant dust, nitrogen oxides, carbon monoxide and carbon dioxide. The local community can be affected by these chemicals and exacerbate respiratory issues, particularly among vulnerable populations. To mitigate these emissions, the implementation of dust collectors, emission control systems, and regular maintenance schedules is imperative. Additionally, continuous monitoring of air quality can ensure compliance with regulatory standards and minimize adverse effects on air quality.

Water resources are another critical aspect affected by ready mixed concrete facilities as water from the facility can be discharged. These sources include water for mixing purposes and any discharge of washout water contaminated with concrete. Contaminated water can contain high pH levels and harmful chemicals which not only affect the local environment but can impact local water quality without proper mitigation. To address this concern, stringent Best Management Practices (BMPs) can be enforced to control water usage and prevent contamination of nearby water bodies like not storing chemicals outside, secondary containment any tanks and areas where chemicals are handled and using a contained area for any concrete washout. Proper containment and treatment of any dischargeable water must be completed to protect the local public health and environment.

Noise pollution can create environmental issues as the operation of heavy machinery and transportation activities can generate excessive noise levels, potentially impacting nearby residential areas and local wildlife. These impacts can lead to stress-related health issues among nearby residents, including sleep disturbances and heightened anxiety. To mitigate this impact, noise barriers and soundproofing techniques can function as measures to minimize noise propagation and protect the well-being of surrounding communities.

Lastly ready mix concrete facilities can increase traffic to the local area from the transportation of raw materials to the facility and delivery of concrete mixtures to construction sites. Increased traffic may contribute to traffic congestion, road wear and increase the risk of accidents and injuries for motorists and pedestrians around and in the facility. These concerns can be mitigated through traffic management plans including scheduling deliveries during off-peak hours and implementing infrastructure improvements, including road construction, speed restrictions and improved signage can be implemented where necessary."

Good Morning,

Thank you for your recent e-mail regarding the application for a proposed concrete batch plant on Goguen Drive. The Town Board and I greatly value public comment, and we intend to include your comments along with any future correspondence related to the pending application as part of our formal record of proceedings. Please be assured we intend to fully address any relevant concerns and/or issues potentially associated with the project by the close of the public hearings, and that we will deeply consider all relevant information prior to making a final decision on the application.

Good Morning,

I am writing to express my concern over the concrete batch plant proposal. I live close by and am very concerned about the pollution, extra traffic, noise, and degrading my home's value. I have children and I am concerned about their health as well.

I hope that you and the other members of the board will properly represent the residents of the town of clay and reject this proposal.

Sincerely,

Julie Lombardi  
Resident at:

**Subject:** Opposition to Proposed Concrete Batch Plant in Town of Clay

Dear Mr. Ulatowski,

I am writing to express my deep concern and opposition regarding the proposed construction of a Concrete Batch Plant filed by Goguen Drive Realty, LLC in close proximity to our residential area. As a resident of this community, I strongly believe that such a development would have significant negative impacts on our quality of life and environment.

The construction and operation of a Concrete Batch Plant would introduce various environmental hazards to our neighborhood. These facilities are known to emit pollutants such as particulate matter, nitrogen oxides, and volatile organic compounds, which can pose serious health risks, particularly to vulnerable populations such as children, the elderly, and individuals with respiratory conditions. Furthermore, the increased traffic, noise, and dust generated by the plant would further degrade air quality and disrupt the peaceful ambiance of our community.

The proposed location of the Concrete Batch Plant is in close proximity to residential properties, raising concerns about property values and potential safety hazards. Studies have shown that the presence of industrial facilities can negatively impact property values, making it more difficult for homeowners to sell their properties or obtain fair market prices. Additionally, the storage and transportation of raw materials and chemicals associated with the operation of the plant could pose safety risks, including the possibility of accidents or spills that may endanger nearby residents.

Beyond the immediate environmental and health concerns, the construction of a Concrete Batch Plant contradicts the character of our community. Our neighborhood is a peaceful residential area where families come to enjoy a safe and healthy environment. The introduction of heavy industrial activity not only undermines this character but also sets a dangerous precedent for further industrial encroachment into residential areas.

I urge you to carefully consider the potential negative impacts of the proposed Concrete Batch Plant on our community and to take decisive action to prevent its construction. I respectfully request that you explore alternative locations for such facilities that are situated away from residential areas and prioritize the health, safety, and well-being of our community members.

Thank you for your attention to this matter. I trust that you will give serious consideration to the concerns raised by myself and other concerned residents.

Sincerely,  
Tracy Terry  
7769 Newhope West  
Liverpool, NY 13090

Good morning,

I am reaching out to communicate mine and many others concerns with this project gaining approval and causing serious health issues for residents in the surrounding areas.

I am located on Nestling Duck in the Wildcreek Neighborhood off of Wetzel Road and this concrete plant will quite literally be in my backyard. I am a father to a 6 month old boy who has health issues at it stands now and reducing the air quality he will grow up in will surely not aid in his development. My wife and I plan to continue growing our family in this neighborhood and town we love but will no longer feel safe doing so with less than acceptable air quality.

The effects of concrete dust is well documented and this is absolutely not the right area, which is continuing to grow, to build this facility. I hope you will do the right thing and disallow the construction and operation of the plant and force them to go to a non residential area.

Sincerely,

**Jill Hageman**

**Subject:** RE: In Opposition of Concrete Batch Plant

Good Morning,

Thank you for your recent e-mail regarding the application for a proposed concrete batch plant on Goguen Drive. The Town Board and I greatly value public comment, and we intend to include your comments along with any future correspondence related to the pending application as part of our formal record of proceedings. Please be assured we intend to fully address any relevant concerns and/or issues potentially associated with the project by the close of the public hearings, and that we will deeply consider all relevant information prior to making a final decision on the application.

**Subject:** In Opposition of Concrete Batch Plant

I am writing to you to express my opposition to the proposed concrete batch plant project located at 7835 Goguen Drive, Liverpool, NY. While I am a capitalist at heart, I am mindful that there is a reason for zoning. Approving this project so close to schools, parks and densely populated neighborhoods is not in the best interest of the citizens of the Town of Clay. I encourage you all to oppose any special permit use that would allow use of any unintended properties in the Town of Clay.

Thank you!

Mary Salamone  
7642 Wild Turkey  
Liverpool, NY 13090

To the Clay Town Board,

I am writing this in reference to the proposed Concrete Batch Plant and Facilities project located at 7835 Goguen Drive Tax Map No. 087.-01-08.1 located at the I-1 Industrial District on +/- 6.24 acres of land in the Town of Clay. I am opposed to the application for a Special Permit pursuant to Section 230-17 E.(2)(a) [4]- Bulk Processing Facility, to allow for a Concrete Batch Plant filed by GOGUEN DRIVE REALTY, LLC and currently pending before the Clay Town Board.

I have been a resident of the Liverpool area over 30 years- Pompton Knolls for 17 years and Bayberry for 13 years. This is a residential area with many housing developments, apartment complexes, Liverpool School District which includes Elementary levels, Middle School and High School level, Nursery Schools, Town of Clay Park, YMCA on Wetzel Road, Churches, and more in Liverpool and Bayberry alone. The Restaurants and shopping centers on Route 31 are about 5 miles from the proposed building site. They are all High Danger Zones. Check out the map to see what regions of CNY are within the 20 mile radius of a Danger Zone.

With this research being presented, you are considering a facility with high health and environmental effects to ANYONE within the 5 mile radius who will be in a HIGH DANGER ZONE, and within the 20 mile radius there will be a DANGER ZONE! How can you be willing to risk the health and environmental effects by allowing the Concrete Batch Plant?

I am VERY concerned, as a long-term resident of Clay (Liverpool) with many friends here, as a parent and grandparent, but also as a Registered Nurse in the Medical Field for 52 years. There are great concerns to me for the health risks for family and friends who have respiratory issues, cardiac issues and cancers. This current proposal is incompatible with the surrounding neighborhoods, may be harmful to the environment, and may represent a health threat for some of our citizens. Thank you for your considerations.

Faith Terry  
5 Orange Tree Lane  
Liverpool, NY 13090  
315-243-7537  
[Fterry13@aol.com](mailto:Fterry13@aol.com)

In researching the Concrete Batch Plant there is evidence of the environmental and health risks that are present. These are:

**Concrete batching plants can pose hazards to the environment and workers.** The hazards associated with concrete batching plants include:

- Highly alkaline wastewater, dust emissions, and noise
- Eye, skin, and respiratory tract irritation from exposure to cement dust
- Inadequate safety guards on equipment
- Inadequate lockout/tagout systems on machinery
- Overexertion and awkward postures
- Slips, trips, and falls
- Chemical burns from wet concrete

**Concrete batching plants** can indeed pose hazards and have environmental impacts. Let's explore both aspects:

**1. Environmental Hazards:**

- **Dust and Particulate Matter:** Concrete batch plants emit dust, which contains particulate matter. This fine dust can penetrate deep into the lungs, leading to health issues. Residents living near these plants often complain about dust covering their roofs, cars, and outdoor spaces.
- **Volatile Organic Compounds (VOCs):** These compounds are another concern. VOCs can irritate the eyes, respiratory system, and skin. They may cause shortness of breath, headaches, fatigue, and memory impairment<sup>1</sup>.

**2. Community Impacts:**

- **Noise and Traffic:** Concrete batch plants operate around the clock, with heavy diesel trucks lining up to pick up loads. These trucks emit pollutants like black carbon and nitrogen dioxide. The noise from idling trucks disrupts neighborhoods, and their presence damages yards and infrastructure.
- **Zoning and Permits:** Houston's lack of zoning regulations, combined with permissive state environmental policies, allows too many concrete batch plants to operate near residential areas. Residents often struggle to breathe due to the dust and pollution<sup>1</sup>.

**3. Safety Hazards:**

- **Maintenance and Cleaning:** When maintenance work or cleaning is carried out at concrete batching plants, safety hazards can arise. Proper safety protocols, including safe work systems and isolation procedures, are essential to prevent unexpected or accidental plant start-ups<sup>2</sup>.

In summary, while concrete batch plants play a crucial role in construction, their environmental impact and safety considerations need careful attention to protect both communities and workers.

**Health and Environmental Effects of Cement Plant Emissions**

Sulfur dioxide (SO<sub>2</sub>) in high concentrations can affect breathing and may aggravate existing respiratory and cardiovascular disease. Sensitive populations include asthmatics, individuals with bronchitis or emphysema, children, and the elderly. Aug 29, 2023

<https://url.avanan.click/v2/https://www.epa.gov/YXAzOnRvd25vZmNsYXk6YTpv0jJZDc2ODI1NzlkODg1MDFmZmExMzAxZTU3OTFjMWI1OjY6NDczNTphZTVjMTBknjU2ODBiYWl3MDFmNTkxMWY5MzYxZDM3N2E2OWU0Nzk1OWJkNjdhYWl3ZjM0MjFIODc0OGFiYjVIOnQ6Rg> enforcement

Concrete batch plants can indeed have health implications, particularly related to **asthma** and **cardiac arrest**. Let's delve into the details:

**1. Asthma:**

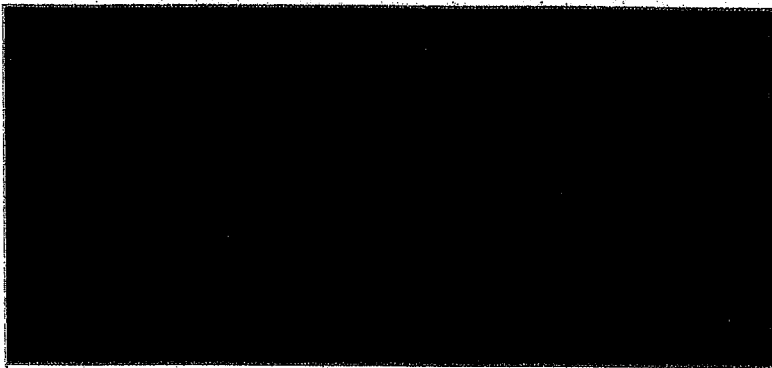

- The Environmental Protection Agency (EPA) has conducted studies and found that concrete batch plants emit **particulate matter** into the air. This particulate matter can pose risks to respiratory health.

- When people inhale excessive amounts of this pollution, it can exacerbate existing respiratory conditions, including **asthma**. The fine particles can irritate the airways and trigger asthma attacks<sup>12</sup>.

## 2. Cardiac Arrest:

- While the primary focus is often on respiratory health, it's essential to recognize that air pollution can also impact cardiovascular health.
- Although there isn't direct evidence linking concrete batch plants to **cardiac arrest**, the same pollutants that affect the respiratory system can also stress the cardiovascular system.
- Prolonged exposure to air pollution, including particulate matter, has been associated with an increased risk of heart problems, including heart attacks and other cardiac events.

In summary, concrete batch plants do emit pollutants that can harm both respiratory and cardiovascular health. It's crucial to consider the location of these plants, especially in neighborhoods, schools, and parks, to minimize the impact on vulnerable populations<sup>312</sup>

### **In Dallas, EPA casts a net for answers on how pollution from concrete ba...**

Alejandra Martinez

EPA scientists went fishing to begin a study of how pollution from a group of concrete batch plants impacts huma...

. If you have concerns about a specific concrete batch plant near you, I recommend staying informed about local regulations and advocating for stricter pollution controls. 🌿 🏠

### **What is a safe distance to live from a concrete plant?**

It also supports the findings of a medical doctor, Crawford, who stated that an area within **five miles** of a cement plant will be the high danger zone and within twenty miles of a cement plant will be the danger zone (CRRRC, 2003).

**Subject:** Concrete Batch Plant Issue

Please find attached a letter in opposition towards the proposed permit for a concrete batch plant in the vicinity of Henry Clay Blvd-Wetzel Road, Town of Clay. Thank you for your attention and representative service to the Town of Clay.  
Jonathan Anderson - Town of Clay resident.

**CONFIDENTIALITY NOTICE:** This is an e-mail transmission and the information is privileged and/or confidential. It is intended only for the use of the individual or entity to which it is addressed. If you have received this communication in error, please notify the sender at the reply e-mail address and delete it from your system without copying or forwarding it. If you are not the intended recipient, you are hereby notified that any retention, distribution, or dissemination of this information is strictly prohibited. Thank you.

**To the Town of clay residents, below is the new environmental and public health statements about Ready mix concrete facilities**

**"A ready-mix concrete plant creates sources of public health and local environmental risks due to noise pollution, irritant dust, air emissions and the potential for contaminated water discharge. These locations contain industrial operations that mix cement, aggregates, and water to create concrete mixtures, which are then transported to construction sites for use. The facility consists of batching plants, mixing equipment, storage silos, and loading areas.**

**Local air quality can be impacted from operational generated emissions and for the transport of material. Operational impacts are due to emissions generated during the mixing process including particulate matter, nitrogen oxides, carbon monoxide, volatile organic compounds, and sulfur dioxide are among the pollutants that may be released from the facility. Other sources of air pollution can occur from the disturbance of nuisance dust from trucks and other traffic added to the area like particulate matter, irritant dust, nitrogen oxides, carbon monoxide and carbon dioxide. The local community can be affected by these chemicals and exacerbate respiratory issues, particularly among vulnerable populations. To mitigate these emissions, the implementation of dust collectors, emission control systems, and regular maintenance schedules is imperative. Additionally, continuous monitoring of air quality can ensure compliance with regulatory standards and minimize adverse effects on air quality.**

**Water resources are another critical aspect affected by ready mixed concrete facilities as water from the facility can be discharged. These sources include water for mixing purposes and any discharge of washout water contaminated with concrete. Contaminated water can contain high pH levels and harmful chemicals which not only affect the local environment but can impact local water quality without proper mitigation. To address this concern, stringent Best Management Practices (BMPs) can be enforced to control water usage and prevent contamination of nearby water bodies like not storing chemicals outside, secondary containment any tanks and areas where chemicals are handled and using a contained area for any concrete washout. Proper containment and treatment of any dischargeable water must be completed to protect the local public health and environment.**

**Noise pollution can create environmental issues as the operation of heavy machinery and transportation activities can generate excessive noise levels, potentially impacting nearby residential areas and local wildlife. These impacts can lead to stress-related health issues among nearby residents, including sleep disturbances and heightened anxiety. To mitigate this impact, noise barriers and soundproofing techniques can function as measures to minimize noise propagation and protect the well-being of surrounding communities.**

**Lastly ready mix concrete facilities can increase traffic to the local area from the transportation of raw materials to the facility and delivery of concrete mixtures to construction sites. Increased traffic may contribute to traffic congestion, road wear and increase the risk of accidents and injuries for motorists and pedestrians around and in the facility. These concerns can be mitigated through traffic management plans including scheduling deliveries during off-peak hours and implementing infrastructure improvements, including road construction, speed restrictions and improved signage can be implemented where necessary."**

**Subject:** Urgent Request to Prevent Concrete Batch Plant Construction in Clay

Dear Supervisor Ulatowski and Members of the Clay Town Board,

I hope this letter finds you well. I am writing to express my deep concern regarding the proposed construction of a concrete batch plant within our community. As a resident of Clay, I believe it is crucial to safeguard our environment, health, and overall quality of life.

1. **Environmental Impact:** The establishment of a concrete batch plant can have significant consequences for our local ecosystem. The production process involves dust emissions, noise pollution, and the release of harmful chemicals. We must consider the impact on air quality, soil, and nearby water bodies.

2. **Air Contamination Health Effects:** Air contamination resulting from cement production can lead to various health issues, including:

**Respiratory Problems:** Fine particulate matter (PM2.5) and other pollutants can exacerbate asthma, bronchitis, and other respiratory conditions.

We are looking forward to hearing more about the issue concerning the proposed concrete plant and why it seemingly appears to have been approved without consideration of the residents nearby.

I have been in this area for 28 years and do not want my investment in my property to have been for nothing.

We are already very leary about Micron and the disruption it will cause. I hope progress does not come at the expense of the residents.

M. Vaughn

**Subject:** Concrete Batch Plant

Dear Town of Clay Supervisor, Deputy Supervisor, and Councilors,

I wanted to write to you to express my concern with the proposed Concrete Batch Plant at 7835 Goguen Dr. I attended the Town Board meeting in Monday March 4th. I understand the type of modern indoor facility that is being proposed, and that this is a concrete batch plant not a cement plant. Still my concerns are with having this type of industry so close to residential property. While in perfect conditions the equipment the plant will emit minimal pollutants, reality is far from perfect especially as equipment ages. I am an engineer that works in a production environment. I fully understand the risks in a process for all stakeholders involved, and we as a community are a stakeholder.

There will be at least one silo full of pure cement powder that is needed to make concrete. Any incidents with this silo could risk air contamination for the entire community. God forbid it were ever accidentally destroyed by human or natural disasters.

The prevention of air contamination is dependent on the filtration system in place. Any malfunction with this system risks air contamination. Equipment ages, and while they will be subject to yearly inspections there is a lot of time between inspections for things to go wrong.

Additionally, during Mondays meeting the applicant stated that he will be crushing the left over concrete spoils with an excavator. This will be happening outside and will create access noise and dust that were not included in the air quality and noise studies that have been conducted.

I have seen accidents happen in production environments even with all preventative measures in place. We have all seen accidents in news that caused environmental disasters. Murphys law states that if it can happen it will, and once it does it's too late.

Sincerely,

Dom Bugge  
7664 Dominion Pkwy

Good Morning,

Thank you for your recent e-mail regarding the application for a proposed concrete batch plant on Goguen Drive. The Town Board and I greatly value public comment, and we intend to include your comments along with any future correspondence related to the pending application as part of our formal record of proceedings. Please be assured we intend to fully address any relevant concerns and/or issues potentially associated with the project by the close of the public hearings, and that we will deeply consider all relevant information prior to making a final decision on the application.

**To:** Town of Clay Supervisor <supervisor@townofclay.org>  
**Subject:** Opposed to concrete batch plant

Dear Damian Ulatowski,

I hope this email finds you well. I am writing to express my serious concerns regarding the proposed construction of a concrete batch plant in our residential area at 7835 Goguen Drive Tax Map No. 087.-01-08 in a I1 industrial district in the town of Clay. As a resident of this community, I believe it is essential to address the potential negative impacts that such a development will have on our neighborhood along with the 1000's of other houses this would be placed in the middle of.

First and foremost, the construction and operation of a concrete batch plant in a residential area pose significant health risks to the residents. These facilities emit various pollutants, including particulate matter, nitrogen oxides, and volatile organic compounds, dust, which can have adverse effects on respiratory health and overall well-being, it has been proven in studies cancer rate also increase in the areas where these plants are located. Particularly for vulnerable populations such as children, the

elderly, and individuals with pre-existing health conditions. Furthermore, the increased traffic, noise, and dust associated with the operation of the plant would further exacerbate these health concerns and diminish our quality of life.

In addition to the health risks, the proposed location of the concrete batch plant raises serious safety concerns for residents. The storage and transportation of raw materials and chemicals used in concrete production could pose a potential hazard, including the risk of accidents, spills, or other emergencies that may endanger the safety of nearby residents and properties. Moreover, the presence of heavy industrial activity in our residential area could have a detrimental impact on property values and deter prospective homebuyers, thereby undermining the economic well-being of our community.

Beyond the immediate health and safety concerns, I am deeply troubled by the potential long-term environmental impact of the concrete batch plant on our neighborhood. The emissions and waste generated by such facilities contribute to air and water pollution, soil contamination, and habitat destruction, threatening the ecological balance of our environment and the sustainability of our community. It has been well documented that there is a high danger zone within a 5 mile radius of these plants by the Environmental Protection Agency.

This plant would be put in the middle of two school districts and many different school buildings which would put these building in the high risk danger zone according to the Environmental Protection Agency. It would also be just a stone's throw away from multiple parks where thousands of kids a year play many different sports, why would we want to endanger that many people with a high risk danger zone. Do we want to risk all the different health risks for all these people?

In light of these concerns, I urge you to carefully reconsider the proposed location of the concrete batch plant and explore alternative sites that are actually zoned for this type of business according the Town of Clay Zoning codes this should be placed in a I2 zone that are situated away from residential areas, parks, schools especially with the business hours of 4am to 5pm. I strongly believe that the health, safety, and well-being of our community must be prioritized above all else, and I trust that you will take the necessary steps to address these concerns in a timely and responsible manner.

Thank you for your attention to this matter. I look forward to hearing from you and working together to ensure the preservation and prosperity of our community.

Sincerely,

Sean Terry

Dear Supervisor and Town Board Members,

I'm writing to request that you vote NO to the Special Permit Application for a concrete batch plant on Goguen Drive in the Town of Clay.

The known and unknown risks to the health and safety of residents living, working, going to school and recreating nearby are just too many and dangerous to allow construction of such a business in this area. Surely there is another, more suitable site for the plant.

Thank you,

**Subject:** Concrete Batch Plant

Dear Mr. Ulatowski,

I want to let you know about my opposition to a special permit, being granted by the town of clay for the purpose of establishing a concrete batch plant on Goguen Drive near Wetzel Road. These plants have been proven beyond a doubt to cause serious air pollution, at least within a 5 mile radius. The YMCA is located close by the proposed site, along with soccer fields, playgrounds, elementary schools, a high school, and hundreds and hundreds of homes and families.

This site is not zoned for this type of industry and I believe that the potential harm to the people of Clay outweighs the business interests in building this type of plant there .

I am very worried about this because this is my home. I and my family have lived in the Town of Clay (within the 5 mile radius) for over 30 years and I'm a homeowner. I have family and friends living closer to the plant as well.

There is no compelling reason that has been demonstrated or communicated to allow a special permit to override what was intended for that area and allow the detrimental effects on people who live and work in the surrounding areas.

A special permit is just that - special and unusual- there would have to be a thoroughly researched and well-founded reason to override the protections already in place for our community. I don't believe that reason exists in this case.

Thank you!

Kara Greene

Town of Clay Resident

Dear Members of the Board,

I am reaching out to you on behalf of my brother, Chris Dambach, to offer a sincere testament to his character and integrity. As a proud resident of the Town of Clay and an active member of our community, I hold a vested interest in ensuring that Chris is regarded honestly and accurately. It is my firm belief that Chris's dedication and commitment to our local community go above and beyond. He has consistently demonstrated a commitment to never cutting corners, prioritizing safety above all else, and steadfastly doing what is right.

Chris has always been more than just a brother to me; he's been a role model, someone I've looked up to, setting an example of what it truly means to do the right thing. While we haven't always seen eye to eye on every aspect of life (as siblings often do), there's one thing I've never doubted for a moment: his unwavering commitment to the well-being of others.

Even as kids, Chris had a profound disdain for anyone who would recklessly endanger our environment or the health of those around us. I can vividly recall how passionately he would speak out against littering, even at a young age. His sense of responsibility and respect for our planet was truly remarkable. I have no doubt that Chris's presence and contributions would be an invaluable asset to our local community. He has consistently shown himself to be ethically conscious, particularly when it comes to safeguarding our environment, ensuring that his actions never compromise the well-being of our planet or its inhabitants.

One of the defining moments of our shared upbringing was witnessing Chris achieve the rank of Eagle Scout. Growing up in a scouting and military family where morals and standards were held to the highest degree, this achievement was nothing short of monumental. It was a testament to his dedication, perseverance, and the values instilled in us from a young age.

Moreover, Chris's commitment to serving his country during the war in Iraq speaks volumes about his character. Despite the challenges and sacrifices he faced, he never wavered in his duty or his sense of responsibility towards his fellow servicemen and women.

In all aspects of his life, whether it's advocating for environmental conservation, supporting his community, or standing up for what he believes in, Chris embodies the values of integrity, compassion, and service.

I believe this Concrete Plant makes sense as it will provide jobs, ensure fast delivery to current and upcoming projects, and promote healthy competition within our county. I know Chris will do the right thing by all parties involved and make sure any concern is heard and mitigated appropriately.

Positive change is on the horizon for our area, whether some folks want to embrace it or not. I can truly say that there is no one better to help contribute to this change than my brother. Our family believes in the growth and the connections we can make to truly make the Town of Clay flourish.

Thank you for considering my honest testimony about my brother. Please don't hesitate to reach out if you require any further information or if there's anything else I can do to support Chris's endeavors. I cannot wait to see our town get "put on the map" and all the exciting things to come!

Warmest regards,

Sarah Dambach

**Subject:** Concrete Batch Plant

Hello. My name is Dan. I live in the Pompton Knolls neighborhood, across the road from the proposed Concrete Batch Plant. I am a supervisor of Respiratory therapy at Upstate Medical University. My job is to help patients who suffer from respiratory disease. I extremely disapprove of a concrete batch plant proposed for this location.

Concrete batch plants produce particulate matter or particulate emissions. Particulate matter are very small particles that are carried easily in the breeze. Being so small, they penetrate into the lungs as we breath in and from that point can cross into the blood stream. Nationwide there are countless studies that show residents who live near concrete batch plants have higher rates of developing Asthma, bronchitis, COPD, Lung cancer, decrease lung volumes, increased lung resistance, cardiac issues such as high blood pressure, peripheral artery disease and heart attack, and also kidney disease. Particulate matter causes skin, eye, sinus and throat irritation. I am sure you wouldn't want to be a contributing cause of someone developing any of these. Any resident within a 5 mile radius of a concrete batch plant are within the HIGH RISK DANGER ZONE. Any resident within 20 miles is considered in the danger zone. I saw the handout that was given out at the meeting last night that suggests the closest house is 1700 feet away. That's a far cry from 5 miles. People within this zone aren't just hanging out for an hour or two. This is their house, where their family is, the food they eat and the water they drink. This doesn't even take into account the diesel trucks turning onto Henry Clay creating more pollution, increased traffic on an already traffic intersection hot spot from 5am until quitting time.

Knowing all this, look at what's located within the 5 mile radius known as the high risk danger zone. The YMCA, which houses a day care. Clay Park which has car shows and several sporting events. The sporting events are almost all children whose lungs are still growing. The weekly car meet up – who is going to bring their car there with all that dust

floating around. Liverpool elementary school, Liverpool high school is maybe a half mile to a mile away. Every sports team plays there. In fact, all of Liverpool's schools fall within that zone. Waterhouse Road has a new day care within the zone. I have enclosed a photo that shows the 5 mile radius that is considered within the high risk danger zone. Do you live in that zone? Do your kids go to school in that zone? Family? Parents? Work? I can't comprehend how anyone would want this for their family, especially their children. Nationwide there are numerous lawsuits against concrete batch plants with decent success. I highly doubt Clay would be any different if this passes. Is this what you really want Clay's image to be? Is this the vision of the future you have of Clay?

I'm not against concrete batch plants, however, it needs to be in the right location. I do understand that area is an industrial park, but it doesn't mean all industry should be there. This is bad for Clay and will greatly decrease the quality of living here. I urge you to think about your vision for Clay in the future. Think of the residents, your family, and your children.

I appreciate your time and pray you say no to this proposal,

Daniel Barber

Dan

As a resident of Clay, I'm truly concerned at some of the decisions the board is making in haste; especially with the proposed concrete batch plant. I would like to understand what homework the board has done to protect its citizens.

I have done research and this is concerning to me and for the future of our kids. There is no doubt that this will increase health issues, hospitalizations and possibly premature deaths. It's not the right place for this type of business. Please reconsider and like I mentioned, I'm open to reading all the research (especially scientific) the board has completed.

Thank you for taking the time to address this.

Lina Lazore

**Subject:** Concrete Batch Plant Concerns

Hi All,

I'm writing regarding concerns with the concrete batch plant that is proposed on Goguen Dr. off Wetzel Rd in the Town of Clay. I'm a homeowner within the Wildcreek/Plum Hollow neighborhood off of Wetzel Rd and within two miles of the proposed plant.

There's substantial scientific literature and past lawsuits stating the negative impacts of cement plant exposure, specifically within a 2 mile radius. These can include a higher risk respiratory issues, lung function decline, increase risk of respiratory cancers in both children and adults.

As elected representatives of residents with a number of neighborhoods in this area it is shocking to me this wasn't already denied. This seems like a rather obvious decision, and I'm sure many of the decisions you all make can be challenging and not as clear cut. This does not seem like one of them. You have thousands of residential homes within a 2 mile radius of the plant location, North Area YMCA and Clay Central Park within a mile, Liverpool HS and Wetzel Rd Elementary within 2 miles. Many of the homes in this radius are families with young kids, as is the case with our family with two children under eight years old who utilize the Clay Central Park for soccer practice/games as well as football practice/games.

Concrete batch plants should not be placed this close to residential neighborhoods, parks, and schools. Specifically when the majority of the immediate neighborhoods and parks, and community centers are downwind of the plant with our prevailing west wind.

I strongly recommend the Town immediately considering denying this application given the location selected, facts, and supporting research provided. As elected representatives of the residents of Clay each of you have an obligation to your residents and this decision seems obvious.

**Subject:** Concrete batch plant off Wetzel Road

I'm writing to you as a resident of the Town of Cicero with property that adjoins the Town of Clay as it relates to the cement plant being considered along Wetzel Road in Liverpool.

I'm extremely concerned about the air pollution that comes from facilities such as this cement plant. Its proposed location is only a few hundred yards from multiple Town of Clay residential developments with households numbering in the thousands as well as schools, a YMCA, several parks and playgrounds, sports fields, and shopping centers. There are studies showing the detrimental health effects on populations within a 5-mile radius of these types of cement facilities. Even the EPA has stated that cement plants are a significant source of sulfur dioxide, nitrogen oxide and carbon monoxide. One study concluded: "We found an association between the exposure to the cement plant emissions and the risk of hospital admission for cardiovascular or respiratory causes, particularly strong for children. The cement plant certainly has an important role as a producer of air pollution."

It is not in the best interest of the community at large, and all neighboring communities who will be impacted by winds carrying this pollution, should the Town of Clay proceed with allowing such a cement plant to be built here.

I urge you to reconsider allowing this to proceed and direct your attention to the links below for various studies and commentary from news sources about cement plants in Texas.

Dan

As a resident of Clay, I'm truly concerned at some of the decisions the board is making in haste; especially with the proposed concrete batch plant. I would like to understand what homework the board has done to protect its citizens.

I have done research and this is concerning to me and for the future of our kids. There is no doubt that this will increase health issues, hospitalizations and possibly premature deaths. It's not the right place for this type of business. Please reconsider and like I mentioned, I'm open to reading all the research (especially scientific) the board has completed.

Thank you for taking the time to address this.

Lina Lazore

**Subject:** Concrete Batch Plant

I have been reading the research about air quality alone and the lack of immediate air compliance regulations associated with this plant. I am requesting that you vote no to this proposal as the 5 mile circle of potential hazardous health effect will affect thousands of children, elderly as well as parents and adults. How many school alone reside within this 5 mile radius is astounding. Please as a constituent of Clay I implore you to vote this down.

Sincerely,

Clem Thompson

ABSOLUTELY NO CONCRETE PLANT WILL BE BUILT. Too many children in the area to be breathing that in. Anyone for that matter. I guess money is more important than people's health? Or is that what you want to do? Look at what Amazon did to that families back yard. You're all fucking sick. There's no way you didn't research the chemicals and the cons of this establishment. If you okay'd this. You're a big problem. I would and could run this town way better than any of you, single handedly. No one wants this bullshit. If it's built, I promise I will be the one to take it down. (Lawfully of course) I don't threaten. :)

Good Afternoon...like many people in the Town of Clay, we just heard about the concrete batch plant proposed for Wetzel Road. We can't believe this is even being considered for this location. #1 problem - MAJOR HEALTH AND ENVIRONMENTAL CONCERNS - #2 problem - This location would have a devastating impact on a densely populated area..being located right in the middle of schools, housing developments, parks, soccer fields, nursery/day care centers, shopping, churches, etc., etc., #3 problem - Their proposal indicates 25-30 employees, which would be 25-30 personal vehicles, 10 trucks making 5 trips a day..that would be in and out 50 times a day. We think this would negatively impact Wetzel Road traffic, considering it is only two lanes and already a very busy road, with two railroad crossings. #4 problem - and we hope this is a misprint...hours would be 4:30 AM to 5:00 PM - Monday thru Friday and possibly Saturday...Saturday, the day Clay Town Park is filled with hundreds of people attending soccer/baseball games..We also find it concerning that this is being proposed now, when NYS will be enacting new laws regarding concrete plants next year. We're sure all the construction anticipated along Route 31 now and for many years to come, and that they already own the property with access to Morgan Road and Henry Clay Boulevard, is why they want to operate this business on Wetzel Road. However, we think a much better location could be found, one that would not have such an impact on a very large portion of the Town. We also want to add, that we have never been negative about growing

the Town for the future. In fact, we wish we could be around for another 25 years to see all the changes that are coming...but a cement plant on Wetzel Road is not one of them.

Regards,

Judy and Bill Carl

**Subject:** Concrete Batch Plant

Dear Town of Clay Supervisor, Deputy Supervisor, and Councilors,

I wanted to write to you to express my concern with the proposed Concrete Batch Plant at 7835 Goguen Dr. I attended the Town Board meeting in Monday March 4th. I understand the type of modern indoor facility that is being proposed, and that this is a concrete batch plant not a cement plant. Still my concerns are with having this type of industry so close to residential property. While in perfect conditions the equipment the plant will emit minimal pollutants, reality is far from perfect especially as equipment ages. I am an engineer that works in a production environment. I fully understand the risks in a process for all stakeholders involved, and we as a community are a stakeholder.

There will be at least one silo full of pure cement powder that is needed to make concrete. Any incidents with this silo could risk air contamination for the entire community. God forbid it were ever accidentally destroyed by human or natural disasters.

The prevention of air contamination is dependent on the filtration system in place. Any malfunction with this system risks air contamination. Equipment ages, and while they will be subject to yearly inspections there is a lot of time between inspections for things to go wrong.

Additionally, during Mondays meeting the applicant stated that he will be crushing the left over concrete spoils with an excavator. This will be happening outside and will create access noise and dust that were not included in the air quality and noise studies that have been conducted.

I have seen accidents happen in production environments even with all preventative measures in place. We have all seen accidents in news that caused environmental disasters. Murphys law states that if it can happen it will, and once it does it's too late.

Sincerely,

Dom Bugge

**Subject:** Re: The Proposed Cement Plant

Hello, Mr. Ulatowski and all Town of Clay Representatives:

My husband and I are residents of the Town of Clay, and we are strongly opposed to the proposed cement factory for the following reasons:

- 1) The potential for health risks to the residents you represent. That alone should be enough to vote no.
- 2) The definite noise increase around this batching plant if approved, with large trucks day in and day out. We rented a VRBO home in the south this year that ended up being near a commercial construction site. There are dump trucks going by all day, and it is awful. The large vehicles also make walking and driving along the road feel unsafe. This will strongly diminish the quality of life for Town of Clay residents, and will reduce property values all around the plant. Why on earth would you want to do that to your own citizens who trust you to do what's best?

3) The timing could not be worse. Micron is coming, bringing hundreds (thousands?) of high-paying jobs to the Town of Clay. These jobs represent educated, highly-skilled people who will want to live near Micron. You know that property values have already increased sharply just because of the news of this facility coming to Clay. So why is the town even considering changing existing zoning regulations to bring in a dirty, noisy plant that will diminish values? You are basically begging the Micron people to take their wealth somewhere else. Live and spend in some other town. Is that your job? I think not.

My husband and I are begging you to refuse to change the zoning, allowing this plant. We know you are getting heavy, well-paid pressure from the plant owner and his friends (many from outside the Town of Clay). Please consider your actual citizens, like us, who vote and will remember when elections roll around. More importantly, please do what's right for Clay simply because it's the right thing to do.

Thank you for your consideration --

**Subject:** Proposed Batch Concrete Plant

Dear Mr. Ulatowski,

I am contacting you as a concerned member of the Liverpool community. Recently my husband and I were thrilled to learn that the property we purchased in Bayberry seven years ago is worth almost 100,000 dollars more than the price we paid for it. Our excitement, however, turned to great concern once we learned from our neighbors that there are plans for a batch concrete plant to be constructed on Goguen Drive off Wetzel Road.

Our concern stems from the fact that according to the United States Environmental Protection Agency's (EPA) website, "The cement sector is the third largest industrial source of pollution, emitting more than 500,000 tons per year of sulfur dioxide, nitrogen oxide, and carbon monoxide." The site goes on to state that these emissions can adversely affect the health of children, the elderly, and individuals with diseases such as asthma, bronchitis or emphysema. Long-term exposure to these chemicals can "damage ... lung tissue for people who work or exercise outside."

The site of the proposed plant is about 2 miles from our property. Located even closer to the site are Morgan Road Elementary School, Liverpool High School, North Area YMCA, and BASCOL Day Care. In addition, there are numerous

businesses located on and off Wetzel road and on Route 57. I am truly mystified why this site was selected for a business that can cause such toxicity to the community.

Micron is coming to Clay and with it will come highly skilled and highly paid employees. Will these employees want to live anywhere near a heavy industrial cement plant? No, they will not.

My husband and I decided to move to this area after living in the city of Syracuse over 30 years to improve the quality of our lives. Yes, we have really enjoyed the past several years in Bayberry. This is a lovely community complete with shopping, restaurants, parks, recreation, medical facilities, and many other amenities nearby. It would be tragic to see the health of the citizens of this wonderful community harmed by toxic pollution.

I look forward to seeing you at the April 1 Town Board meeting.

Joanne Capella

**Subject:** In Support of the Concrete Batch Plant

Good evening Mr. Ulatowski and Members of the Board,

I am writing to express my support for Mr. Chris Dambach to be awarded all applicable permits for the construction and operation of the batch concrete plant, and to respond pursuant to complaint #22-5195.

My personal address is:

5104 Coffee Tree Lane

North Syracuse, NY 13212

In the twelve or so years of having the pleasure to work with Chris in a professional capacity, and getting to know Chris on a personal level, I can summarize what I know about him in a simple statement: Chris is dedicated, well past the point of self-interest, to doing what he believes will benefit those around him. He will even do so at his own detriment, as long as he knows that it is the right thing to do. I've known him to consult often with his closest friends just to check himself and to confirm what he is doing is best for his friends, his family, his community and everyone he can possibly benefit with his decisions. He investigates himself and his own motives deeply in every decision. It is part of what I believe has found him the level of success he has gained today.

I actually approached this concern from the perspective of those opposed to the construction project first, without speaking to Chris or anyone who might be in support of the project, to learn what merits and truth lie behind the community's concerns. I have a 4 year old myself and would want to be assured of our continued health and well-being. I believe everyone who has a concern about the project very much wants to be assured of its safety, however upon joining the Community Concern group on Facebook (<https://www.facebook.com/groups/207513669084470>) I was quickly muted by the admin (without even submitting a single comment) which, running contrary to a democratic approach, only really has served to inflame the emotions of a vocal few surrounding the topic. So I felt compelled to express my thoughts here where I may have a fair and mature consideration given.

After speaking with my father, Dr. Robert A. Dracker, a prominent healthcare provider in our community, along with consulting several members of my professional and research network who are more informed than I on the topic, I was reassured that the concerns of opposing parties are largely not backed up by research. I was pointed to several studies via PubMed and other medical publications which weigh in on issues surrounding a Concrete vs a Cement

manufacturing facility. I believe many people opposed in our community are erroneously concerned about issues which are more relevant more to a *cement* factory (which is not being produced) rather than a concrete batch facility (which is intended to be built). Many of the studies which imply negative impacts predate modern systems and cite old data from plants which do not have ancillary dust mitigation and water recycling apparatus installed - systems which I know Chris will absolutely install at his facility for the welfare of the environment and the community. I have therewith come to be reassured there is very little environmental, particulate and pollutant hazards, especially whereas modern ancillary systems have been designed to greatly mitigate or completely eliminate the concerns the community is expressing.

The community opposed to the project is operating under the assumption that standards will be barely or merely met by those they perceive to be only self-interested. I know Chris to be the complete opposite of this characterization, instead being driven by an aspiration for excellence and concern for those around him in everything he sets his hands to.

Comparatively, I believe the plant will be less impactful on our environment and communities than some of the more recent local projects that have been approved in the Town of Clay, i.e. the solar plant that was somehow allowed to be installed alongside an existing daycare on Waterhouse Rd. (where my 4 year old attends) when there have been many recent reports of ballast and capacitor systems catching fire and producing toxic and potentially fatal fumes. And I also believe that, in an economic environment like we have today, projects like Chris' represent the opportunity to create many more solid and long-term jobs than projects like the above-mentioned solar field, with a much more positive local economic impact than that project.

I believe we all have a bad habit in CNY of turning a blind eye to large projects like the solar field, the Amazon facilities and the Micron facility, all of which are undoubtedly proven to generate massive heavy-metal particulates and pollutants on an exponential scale compared to something like this. Yet we disregard and get too inflamed about the aspirations of business owners like Chris, whereas if we had more people creating medium-sized operations like this, we would together make a corporeal and positive impact on the economic and general well-being of our communities. Micron may or may not happen... it is not our "only hope". Our best hope is helping many more aspiring business leaders like Chris establish operations here so we can reach a density of economic activity which will contribute to a tangible growth in the quality and standards of living of our community members who may be employed by such efforts.

With my gratitude and appreciation for your consideration and efforts to make the right decisions for our community in the Town of Clay, thank you for reading my response.

Robert A Dracker
